Phase 2 Plan

SMS for members, and COG's assistance forms online. Members apply from their dashboard, and the COG team reviews everything in one place.

01 SMS through MSG91

- Members get their login code by SMS within seconds.
- They also get an SMS when their membership is approved, when an application is received, and when its status changes.
- A daily limit on login codes, with an alert to the admin if something looks unusual, protects COG's SMS credit from misuse.
- Starts as soon as DLT registration is approved (see the separate DLT guide).

02 Assistance forms online

The six forms in the Drive move onto the portal, with the same sections as the printed versions:

Education Assistance
School fees and study support

Higher Education Loan
College and university support

Housing Assistance
Housing and home repair support

Medical Sahay
Treatment and hospital costs

Sports Upliftment
Support for athletes

Widow Sahay
Support for widows and families

For the member:

- Apply from the dashboard in English or Gujarati. Details already in their profile (name, mobile, address, Jamaat) are filled in automatically.
- Upload photos and documents (ID, fee receipts, medical reports) from a phone. Documents stay private and are seen only by authorised COG staff.
- Save a half-filled form and finish it later.
- After submitting, get an application number and track its status under "My Applications".

03 For the COG team

- See all applications for each form in one list, and search or filter by status, Jamaat, city or date.
- Open an application to read the answers and view the uploaded documents.
- Move it through clear stages: *Received* → *Under Review* → *More Documents Needed* → *Approved / Rejected*. The member is informed by SMS at each step.

- Add internal notes that the member cannot see.
- Download applications to Excel for meetings and records.
- Choose which team members can see or act on each form. Every action is recorded, as it is today.

04 COG manages its own forms

Admins can change the forms themselves, without asking a developer:

- Add, edit, reorder or remove questions and sections
- Choose the answer type: short or long text, number, date, a choice from a list, yes / no, a document upload, or a table (such as family members)
- Mark a question as required, and add helper text in English and Gujarati
- Open or close a form, for example for each academic year
- Create a new form for a new programme

> Changing a form never alters applications already submitted. Each one keeps the exact questions the member answered.

05 Timeline (about 6 weeks)

When	What you will see
Weeks 1–2	Form builder for admins, with the first form (Medical Sahay) built on it for your review
Weeks 3–4	All six forms live for members, with document uploads and "My Applications"
Week 5	COG review screens, status updates, notes and Excel download
Week 6	SMS switched on, full testing with the COG team, then launch

SMS can go live earlier, as soon as DLT is approved.

06 What we need from COG

- [ ] Start DLT registration this week
- [ ] Confirm the six forms are final for 2026–27, and which one should go first
- [ ] Tell us who on the team should review each form
- [ ] Tell us whether Jamaat verification is a separate step before COG's decision
- [ ] Review the Gujarati wording of the forms once they are online
